# Dalet and Quantum Provide Leading Solutions for Sports Networks

Sports networks are operationally intense, complex, and demanding. Producing and managing game-time highlights and news, post-game analysis, promotional advertisements, and multi-platform sports content distribution requires specific tools and workflows that enable collaboration, multi-device delivery, high performance, and flexibility to scale. With the Dalet and Quantum end-to-end solution, you can optimize your video production workflow by bringing all of your workflows into a single collaborative platform. Not only will you maximize your game-day coverage, but you'll be able to easily access your archive of key plays whenever you need it. Quantum's StorNext® high-performance storage infrastructure and Dalet's end-to-end production, management, and distribution platform are seamlessly integrated to provide a complete solution to help you make the most of your content—easily and efficiently.

KEY BENEFITS

- Capture the entire game from all angles, so you don't miss a moment.
- Enrich your media with metadata to find and repurpose content.
- Produce content fast and efficiently on popular non-linear editing systems (NLEs) connected to Dalet.
- Repurpose content in multiple formats and send to multiple locations.
- Develop your system at your own pace and reduce your total cost of ownership by preserving existing equipment.
- Collaborate in real time through multiple ingest, edit, and delivery across geographies.
- Gain unlimited scalability to 4K and beyond.
- Consolidate multiple storage devices into a single shared storage pool.
- Get continuous access to content while reducing storage costs with multi-tier archiving.

Dalet and Quantum have successfully worked together to design, deploy, and support customers with very large and complex environments. For nearly a decade, both companies have collaborated to optimize and integrate the joint solution at the deepest level. The solution provides the workflows users need while reducing the complexity. And the Dalet and Quantum teams are continuously incorporating what they have learned from customer installations into best practices. To ensure future compatibility and seamless integration, the Dalet and Quantum engineering teams work closely together on product roadmaps, new product validations, and more.

ABOUT DALET

Dalet solutions and services enable media organizations to create, manage, and distribute content faster and more efficiently, fully maximizing the value of assets. Based on an agile foundation, Dalet solutions offer rich collaborative tools to power end-to-end workflows for news, sports, program preparation, post-production, archives, radio, education, governments, and institutions. Dalet platforms are scalable and modular. They offer targeted applications with key capabilities to address critical functions of small to large media operations—such as planning and workflow orchestration, ingest and cataloging, editing, chat and notifications, transcoding, playout automation, multi-platform distribution, and analytics.

Dalet systems are used around the world by hundreds of TV and radio content producers, including public broadcasters (BBC, CBC, France TV, Rai RFI, Russia Today (RT), RT Malaysia, and VOA), commercial networks and operators (Canal+, FOX, MBC Dubai, Mediacorp, Mediaset, Orange TV, Time Warner Cable, Warner Bros., and Sirius XM Satellite Radio), and government organizations (Canadian House of Commons, Australian Parliament, and UK Parliament).

ABOUT QUANTUM

Quantum is a leading expert in scale-out storage, archive, and data protection, providing solutions for capturing, sharing, and preserving digital assets over the entire data lifecycle. From small businesses to major enterprises, more than 100,000 customers have trusted Quantum to address their most demanding data workflow challenges. Quantum's end-to-end, tiered storage foundation enables customers to maximize the value of their data by making it accessible whenever and wherever needed, retaining it indefinitely, and reducing total cost and complexity.
